Functional specification

Project scope

Goals

The goal with this website is to give visitors to Bergen the ability to find hotels, B&B's and guesthouses.

Features

Search bar

A search function will give the user the ability to search for certain hotels or areas to residence in.

Target group

This website will mainly be aimed towards families with children in all ages, but also couples who wants to have a nice holiday together.

Results page

Will show all hotels that have been searched after.

Hotel specific

Will show all the necessary information about the specific hotel.

Enquiry page or modal and contact page.

A modal where the user can ask the staff a specific question of different topics about the hotels.

Deadline

The deadline for the project is Sunday, February 14th 2021.

Risks and assumptions

Make sure that the search bar is showing the right results when the user is typing the specific word.

Make sure that the contact page and enquiry modal/page is working properly to get the feedback they have to the website.

Product overview

This product will help the tourists coming to Bergen to find a suitable hotel, B&B's or guesthouses for their need. It will make it easier for the tourists to compare the different hotels to find the suitable needs.

Use cases

Family of 4

Young couple

Requirements
